A Live Wire

Every nerve is a live wire connecting some part of the body with the brain. They are so numerous that if you pene-trate the skin with the point of a needle you will touch a nerve and receive a shock-pain it is called. Aches and pains come from a pressure, strain or injury to a nerve; the more prominent the nerve the greater the pain. When the pain comes from a large nerve it is called Neuralgia

whether it be the facial nerves, or the heart, stomach, sciatic or other prominent nerve branch. To stop pain, then, you must relieve the strain or pressure upon the nerves. Dr. Miles' Anti-Pain Pills do

this.
